

November 25, 2025

Global Alerts

Snowfall / Blizzard – Russia

Affected Areas

Northwestern Russia, Central Russia, Northern Volga Region, Arctic Coastal Belt

Duration

25th to 27th November, 2025

Hazard Types

Snowfall / Blizzard Conditions

Hazard Summary

A strong winter system is forecast to produce moderate to heavy snowfall, accompanied by snow and sharply reduced visibility. Arctic and northern areas may face near blizzard conditions driven by high winds. Travel delays, road closures, and flight disruptions are expected, particularly during peak snowfall. Residents should avoid non-essential travel and follow local advisories.
