P R E F A C E

The Reconstruction and Rehabilitation Programme implementation took off in April 2006. By that time, ERRA had already gained momentum in the planning and strategy development and started devolving responsibilities with due focus on building capacity of its affiliates, SERRA/PERRA and DRUs.

The enormity, complexity and diversity of reconstruction and rehabilitation programme afforded unparalleled experiences that opened new avenues for learning to people within the organization, as well as to stakeholders, development practitioners, planners and managers, academic institutions and international community. One such avenue led to the development of District Profiles of the nine earthquake affected districts.

The impediments faced in collecting accurate data for damage assessment of the earthquake and for planning reconstruction strategies was a sufficient indicator for ERRA to address the deficiency timely and pragmatically to ensure that such a situation would not be repeated in the future.

Therefore, ERRA, together with its affiliates SERRA/PERRA and DRUs, initiated compilation of available district specific data/information on relevant socio-economic and physical indicators in the form of District Profile to serve as a baseline and a reference point for planning and monitoring progress of work.

The first District Profile has been completed in July 2007. It will be updated regularly with information received from the field through MIS reporting mechanism on the progress of each programme sector with necessary analysis.

The document, it is hoped, will become a useful source of information on district's progressive development under the reconstruction and rehabilitation programme.

I avail this opportunity to thank ERRA team and its affiliates for dedicating their time and efforts to prepare the document, and our development partners for their encouragement and support in the process.

Altaf M. Saleem
Chairman

ACKNOWLEDGEMENTS

The Earthquake Reconstruction and Rehabilitation Authority (ERRA) is grateful to the Government of Azad Jammu and Kashmir (AJK) and the Government of the North West Frontier Province (NWFP), State/Provincial Reconstruction and Rehabilitation Agencies (SERRA/PERRA), District Reconstruction Units (DRUs) and line departments for their cooperation and practical assistance in the collection, verification and consolidation of information for the District Profile.

ERRA is also thankful to UN-WFP and NESPAK for jointly providing useful maps for the districts, which are part of the profile.

Contributions and support by various Wings and Cells within ERRA to Knowledge Management Team in the process, is duly acknowledged.

Finally, it was a collective effort by the larger ERRA family that had received tremendous support from its partners in development, the G-7 group of donors. ERRA fully acknowledges their support.

Lt. Gen. Nadeem Ahmed
Deputy Chairman
ERRA

Khadija Khan
Chief
Knowledge Management

EXECUTIVE SUMMARY

The District Profile Mansehra was initiated in order to document overall earthquake damage and reconstruction scenario which could be used as a ready reference point on information for the planning and development purposes. The document contains three chapters. Chapter one is the introductory chapter, second chapter gives tabulated information about the district before the earthquake and last chapter assesses the damages due to earthquake and subsequent reconstruction plans.

Mansehra was a large district with a total area of 4,579 sq km. According to 1998 Census Report its total population is 1,152,839 with an average annual growth rate of 2.4%. The other socio-economic indicators were; life expectancy 63 years, household size 6.7 persons, literacy rate 36.3 and disabled population 1.6%. Most of the population (84.3%) had their own houses. Only 32.1% of the population has the facility of drinking water inside their homes.

The growth in the social sector could not be gauged accurately due to inconsistency in data. However, there is slight growth in the education institutions. The number of higher secondary schools increased from 13 to 16, high schools from 96 to 105, middle schools from 160 to 179 during the period of 1998 to 2005. As far community/public health facilities are concerned, there is no significant increase over the period from 1998 to 2005.

Mansehra District was the worst affected district of NWFP in the earthquake in terms of human losses and destruction of physical infrastructure. According to district government 15,997 persons died while 9,903 were injured due to earthquake. Besides the loss of precious human lives, the number of housing units destroyed due to disaster was also implacably higher. As many as 108,283 housing units were completely destroyed and 34,001 partially damaged. Balakot city, which is part of Mansehra District was located on the fault line. Due to this it has been declared RED ZONE and plan is made to relocate it to a new place called Bakriyal.

Education sector faced very heavy damages in terms of buildings. Besides, loss of lives of the students and teachers was unimaginably higher. There were 935 institutions recorded as fully damaged and some 624 were partially damaged in the earthquake.

The district has suffered a significant loss of livelihood due to the earthquake that has caused damage to the land, crops, livestock, and infrastructure.

The Earthquake Reconstruction and Rehabilitation Authority (ERRA) in close collaboration with the Government of NWFP, Provincial Reconstruction and Rehabilitation Agency (PERRA), District Reconstruction Unit (DRU), line departments and development partners has launched a comprehensive reconstruction programme consisting of 12 major sectors. According to the programme, a significant financial and technical investment will be made in the district which will be rationally distributed across sectors to ensure a balanced development.

Chapter 1

Introduction¹

Immediately after the earthquake, the need for collecting information became critical to make an accurate damage assessment of the economic and physical losses which were crucial for planning reconstruction and rehabilitation of the affected area. It was realized that there was not only a lack of information, but also the sources of information were scattered and in a variety of forms. A lot of data had to be restructured by the experts from the Census Reports of 1998 and the provincial government and line departments' internal reports; and projections were made where needed, to produce the preliminary damage assessment.

In the following phase of planning, most of the above baseline information was complemented with second round of sector wise assessment to evolve strategies and refine plans in the context of government policy to rationalize the reconstruction process.

As far district specific information is concerned, there used to be a document called gazetteer. The existing district gazetteers have not been updated over time and therefore are out of synch with the current requirements of planning and policy making.

ERRA took a considered decision to address the situation and accordingly undertook the initiative for developing District Profiles to serve as a complete account of a district's state and situation of development reflected in pre and post earthquake socio-economic and physical indicators, earthquake damages, reconstruction plans and the progress over the life time of ERRA.

1.1 The Landscape and Physical Features of the Area

Mansehra District of NWFP consists of three tehsils – Mansehra, Oghi, and Balakot and provincially administers tribal area (PATA) of Kala Dhaka. The District is located from 34° - 14' to 35° - 11' north latitudes and 72° - 49' to 74° - 08' east longitudes. Its total area is 4,579 square kilometers.

Mansehra makes its boundary on the north to Kohistan and Battagram districts, on the east to Muzaffarabad district of Azad Jammu & Kashmir, on the south to Abbottabad and Haripur districts and on the west to Shangla and Buner districts.

At the time of Alexander the Great, this area was part of District Hazara and was named as Urasha. In seventeenth century, it was part of the kingdom Valu-Lashi in North West of Kashmir. It was called as Pakhli Sarkar during Mughal period. After Mughal period, in 17th century, Swatis, a local pathan tribe which was driven out of Swat, invaded this area. Turks were defeated and driven out of the area by Swatis. When Mukhan Singh, Governor of Rawalpindi invaded Hazara in early 19th century, Sikh rule started in the area. In the succeeding years Ranjeet Singh occupied the area. Afterwards, Sardar Hari Singh, Governor of Kashmir dominated the area by defeating Tanolis and Jadoons.

¹ 1998 District Census Report of Mansehra

By 1825 the whole area, except Kaghan, was under Sikh rule. The following picture of Gurdawara with today serves as municipal library shows the Sikh rule in the area. In 1828, Mujahideen led by Syed Ahmad Ali rose against Sikhs but were defeated. They appeared again by 1930 and captured some part of the area, but in an engagement at Balakot, Mujahideen were defeated. Afterwards, the the area came under the British rule.

Sri Guru Singh Sabha (Municipal Library)

The name of District ‘Mansehra’ is derived from its headquarters town Mansehra. It is named after Man Singh, the Governor General under the rule of Ranjit Singh.

Mansehra District is dominated by high mountains, varying in elevation from 200 meters in the south to over 4500 meters above sea level in the north. The famous Babusar pass is situated on the north-eastern boundary of the district. The Nanga Parbat Mountain is located about 40 kilometers from the north eastern boundary of the district.

The climate is cold in much winter and pleasantly warm in summer. The northern part like Kaghan valley is cold in summer and extremely cold in winter and it receives heavy snow fall. District has two distinct seasons; the summer season which lasts from April to September and winter season which is from October to March. The mean maximum and minimum temperatures during the month of June are about 35° C and 21° C respectively. During the coldest month of January, the mean maximum and minimum temperatures are 14° C and 2° C.

There are two cropping seasons in the district. One is called ‘Kharif’ which ranges from May to September. Maize, rice and seasonal vegetables are grown in this season. Second is called ‘Rabi’ which ranges from the month of October to March. Wheat, peas and other seasonal vegetables are grown in this season. Due to favorable climatic conditions, the district is rich in vegetables and fruit. Cabbage, carrot and reddish in vegetables and peaches, plums and pears in fruit are grown in the area.

District Manshera is rich in flora. A variety of herbs is found throughout the district. Many of these herbs are used for medicinal purposes. These include Gulkhaira, Khtmi, Musli Sufead, Kadpai, Thandibotti, Sumal, Kakul, Ispaghol, Patris, Manira, Chora, Banafsha, Bantol, Chau, Kuthi Raisha Khatmi and Nera. A large variety of fauna is also available in the district. This includes leopard, porcupine, black bear, monal, koklas pheasant, jackal, wild goat, brown bear, wolf and other migratory birds.

There are two major rivers in the district known as River Kunhar and River Siran. River Siran passes through the Pakhal valley and irrigates major part of the land. River Kunhar starts from lake Saiful-Muluk and after falling some congruent paths reaches Balakot and Garhi Habibullah from where it turns to Muzaffarabad. It then meets River Neelum.

Mansehra District has natural resources that are extracted from mines. In Kaghan, ores of paradox, whereas in Oghi and Battal ores of graphite have been discovered.

1.2 Industry, Trade and Commerce

People of the district are involved in various trade, business and labour activities. People are also employed in government sector. A large number of people have gone abroad mostly to Middle Eastern countries especially Saudi Arabia and United Arab Emirates, to earn their livelihoods. People are also significantly involved in the field of agriculture. Besides this, transport is another business for the people of District Mansehra.

1.3 The People

Mansehra District comprises of different groups of people from diverse ethnic backgrounds. These include Gujar, Swati, Tanoli, Syed and Awan. Locally cultivated wheat, maize and rice are generally used in food by the people of the area. Curry, called as 'salan' is the essential constituent of meals which is eaten with rice or wheat bread (rotti). People of the area wear traditional dress consisting of shalwar (loose trouser), kameez (long shirt) and turban. Women add chaddar or dopata in addition to the shalwar and kameez.

1.4 Roads

Mansehra is connected with other districts of NWFP and AJK, by road network. No airport is available. Total road network as per 1998 Census Report pre- earthquake is:

Metalled road	473 km
Fair-weather road	277 km

There are two national Highways namely; Karakoram Highway (KKH) and Mansehra Narran Jalkhat (MNJ) road. The former serves as a link to rest of Pakistan and the Northern Areas while the latter originates from KKH in Mansehra city and links Kaghan valley with rest of the country. It also connects to important places in the Kaghan Valley, such as Naran, Shogran, Lake Saiful Muluk and Babusar Top. The KKH passes through the district. However, both roads are prone to frequent land-slides, especially during the rainy season.

1.5 Telecommunication

The Pakistan Telecommunication Company Ltd. (PTCL) with an extensive telephone network operates in the district. All the main towns in the district have connectivity with 28,377 telephone lines. All cellular phone companies are functioning with considerable coverage in all major towns. In addition, internet facility is also available in major towns of the district while connection speed remains a problem.

1.6 Power

Mansehra is linked with national grid system spread across the country for supply of electric power. The distribution network within the district is the responsibility of Peshawar Electricity Supply Company (PESCO). Most of the villages and towns are quite well serviced in terms of electric power with 137,689 connections of which 136,720 are domestic connections followed by 859 industrial connections.

1.7 Administration

Under the Local Government Act 2001, the District Nazim is the administrative head of the District Government; while District Coordination Officer (DCO) heads the administrative machinery. Each line department is headed by an Executive District Officer (EDO). Tehsil Municipal Administrations of Mansehra, Balakot and Oghi are led by respective Tehsil Nazims while Kala Dhaka is administered through an Administrative Officer directly responsible to the DCO.

1.8 Important Places

The district is very famous from tourism point of view. The main tourist sites in the district include Baffa, Dadar, Balakot, Kaghan Valley, Oghi, Shogran, Naran and the famous lake Saiful-Muluk. Besides, the famous shrines of Shah Ahmad Shaheed and Shah Ismail Shaheed, who fought the battle with Sikhs in 19th century, are also historic places to visit.

Chapter 2

Pre-Earthquake Socio-Economic and Physical Indicators Baseline District Census Report 1998 with Updates on Selected Indicators

2.1 Overview

According to 1998 District Census Report, Mansehra has a population of 1,152,839 with an annual growth rate of 2.4 percent. The average household size, both for rural and urban areas, is 6.7 persons.

Out of the total district population, 1,091,463 (94.7%) is living in rural areas. The male to female sex ratio in rural and urban areas of the district is 98 and 106 respectively. This higher sex ratio in urban areas could be due to sex selective migration to these areas.

The disabled population constitutes 1.6% of the total population. Among them almost two-third is male and one-third is female.

The literacy rate of District Mansehra is 36.3%. It is 50.9% for male and 22.7% for female. The literacy rate is much higher in urban areas as compared to rural areas both for male and female i.e. 44.3% and 19.9% for urban and rural areas, respectively.

For the total population aged 18 years and above, 67.2% has attained National Identity Cards. The rate is 81.8% for male and 54.3% for female. Rural and Urban population share, in this regards, is 66% and 79% respectively.

As far the type of construction, 62.6% rural and 79.8% urban housing units are build with backed bricks, blocks or stones, whereas 34.5% rural and 17.8% urban housing units are build with un-backed bricks. Only 1.4% are build with wood or bamboo. According to 1998 District Census Report, there are 34.4% housing units having one room, 61.4% with 2-4 rooms and 4.2% with five and more rooms. At average one housing unit has 2.1 rooms and there are 6.7 persons per housing unit.

2.2 Sector-Specific Information

The information given in the following tables to establish a pre-earthquake baseline is primarily taken from **District Census Report of Mansehra - 1998**. It has been updated, wherever possible with the help of information from various other sources.

Statement for Prior Clarification

The Third Chapter comprises of figures and statistics on Extent of Damages and Reconstruction Plans which have been taken from the Preliminary Damage Assessment Report by ADB/WB, ERRAs Sectoral Strategy Documents and input from the respective DRU. Moreover, figures of 2nd assessment carried out in Housing Sector have been incorporated. Data regarding power sector has been taken from PESCO. The exercise for specific need-base re-assessments and reconciliation of project level planning is underway. Any new project identified and agreed upon by ERRAs will be incorporated in the strategies in due course of time.

Chapter 3

Extent of Damages due to Earthquake and Sector-Wise / Year-Wise Reconstruction Plan

The earthquake of October 2005 affected almost all aspects of socio-economic life of the people as well as physical infrastructure of the district. As reported by the District Government, the loss of human lives in Mansehra was 15,997 while 9,903 persons were injured. In addition, a huge number of population was displaced. As a result a total of Rs.256.891 billion has been paid as compensation for deaths and injuries in the district as of June, 2006.

3.1 Housing Sector

i. Extent of Damages

Private housing sector suffered a huge loss in the district; as many as 108,283 (71%) houses were completely damaged/destroyed and 34,001 (22%) were partially damaged while 10,673 (7%) were negligibly damaged. A sum of Rs.5,910.550 million has been paid by June 2006 on account of compensation. The obvious reason for this heavy damage was the location of epicenter of the earthquake close to Mansehra while Balakot was on the fault line. As a result housing units in Balakot town and its surrounding areas were fully destroyed. Similarly Siran valley and many other parts of the district received the brunt of the shock; resulting in the dislocation and destruction of not only houses in the private sector but also many government owned buildings and structures. Main cause of heavy destruction in housing sector is based on weaknesses of the structural design that could not sustain the seismic shock.

Extent of Damages - Housing Sector					
Destroyed		Partially Damaged		Negligible Damaged	
No.	%	No.	%	No.	%
1,08,283	71	34,001	22	10,673	7

Source: Internal Sources of ERRA – Housing Sector

ii. Reconstruction Plan

The reconstruction plan of Mansehra, as part of the overall Housing Reconstruction Strategy, consists of following two components:

- a. Rural Housing
- b. Town Planning.

a. Rural Housing

ERRA with the assistance of Pakistan Army carried out a Housing Survey and engaged NADRA to establish a database that was used as the mechanism for screening the applications for eligibility and progressive disbursement of financial assistance for the reconstruction of private housing.

During the relief phase, the first installment of Rs.25,000 was made available under housing compensation to all those people whose houses were identified as fully or partially-damaged.

In order to ensure availability of construction material for housing, 73 construction material hubs have been established throughout the affected districts in NWFP; out of which 45 hubs are located in Mansehra District and reconstruction activity has gained considerable momentum². As per 34th report of the Regional Housing Coordinator, NWFP dated May 30, 2007 a sum of Rs.5923.300 million has been disbursed to as many as 88,836 beneficiaries in Mansehra District. Training in seismically resistant house reconstruction has been planned and delivered through Housing Reconstruction Centers in the affected areas. In Mansehra District 32,526 individuals have received training in reconstruction skills namely plumbing, carpentry, masonry and as electrician.

b. Town Planning

The city of Balakot received heavy damages due to the earthquake; as a result it has to be rebuilt at Bakriyal; for which 1120 kanals of land has been acquired as whole Balakot town, lying on the fault line, has been declared as Red Zone. The same has been vacated and construction thereon has been banned.

New Balakot is being planned with a 30-years vision for a population of approximately 50,000 people. It is being developed as 'Peripheral Geographical Region' in order to provide opportunity to revive its tourism and livelihood potential.

Funds for land acquisition of new Balakot city has been transferred to the account of District Officer (Revenue), Mansehra. Land acquisition process is being completed shortly.

3.2 Livelihood

i. Extent of Damages

Details of district-wise damages to the livelihoods of people are not available. The total job losses for five affected districts of NWFP were 192,000 as indicated in ADB/ WB report. However, according to preliminary estimation, there were direct and indirect losses to the sector of formal and non-formal employment as well as to agriculture, livestock, irrigation, etc. Besides losing physical livelihood means, people lost intangible social assets i.e. capacity to work and the environment; that would take long time to be restored to earlier state. Number and percentage of employment losses to major economic sectors was estimated as indicated in the following table:

¹ Internal Sources of DRU/ District Government

² ERRA Update on Construction Material Hubs

Employment Losses - NWFP			
Sectors	Pre-Earthquake	%	Empl. Loss
Agriculture and Forestry	359,110	32	116,003
Mining	2,933	39	1,157
Manufacturing	14,515	34	4,881
Utility	6,050	32	1,926

Source: ADB/WB Pakistan 2005 Earthquake - Preliminary Damage and Needs Assessment

Part of damages to livelihood could be gauged from the extent of efforts need to be undertaken to revive the livelihood of people, as detailed in the following table:

Damages to Crop, Livestock, Irrigation Sector - NWFP			
Amount in Rs. million	Direct Damage	Indirect Damage	Total Loss
Crop	746.8	182.8	929.6
Livestock	3933.8	2370.0	6303.8
Irrigation	83.7	-	83.7
(in Rs. million)	4764.3	2552	7317.1
(in US\$ million)	80.2	43.0	123.2

Source: ADB/WB Pakistan 2005 Earthquake- Preliminary Damage and Need Assessment

ii. Reconstruction Plan

a. Livelihood (Cash Grants) Programme

The livelihood programme has one immediate intervention under the title of Livelihood Cash Grants Programme which focused on provision of cash grants to vulnerable families, selected on the basis of eligibility criteria, primarily to meet their immediate food and non-food needs over a period of six months. District Mansehra is the first district where the programme was launched with effect from May 20, 2006. The programme was being implemented progressively in all the affected districts between September, 2006 and June, 2007. A fixed amount of Rs.3000 per month was being provided to families fulfilling the criteria. As many as 47,800 affected families were provided Rs.860.400 million by 1st March, 2007 under the Cash Grants Programme

The programme was given a further six months extension to assist the most vulnerable families in the affected areas.

b. Livelihood Core Programme

The livelihood core programme strategy focuses on rehabilitation of primary industry, small business and employment. The strategy is based on a participatory approach whereby villages/communities are being assisted in preparing Community Livelihood Rehabilitation Plans (CLRP) which shall be a set of prioritized needs. Once the plan is agreed/ approved, each village shall be eligible for Rs.750,000 grant to address the identified needs with the assistance of concerned government technical departments. The indicative eligible investments for this grant are livestock production, fruit and vegetable production, replacement and repair of damaged traditional irrigation systems, restoration of small access roads, rehabilitation of terraces, and rehabilitation of emergency employment centres and provision of micro finance facilities. The DRU based Livelihood Coordinators shall be the main focal persons to lead the planning and implementation process. A Livelihoods Coordination Forum, consisting of all projects and NGOs involved in livelihood related activities shall be the main coordination and approval forum.

With a view to enhance agriculture/ fruit production and overcome difficulties of the affected masses for rearing of livestock/ animals by use of innovative technologies and increased provision of extension services, the concerned line departments need to be strengthened and equipped to restore their capabilities to pre-earthquake levels. For this purpose a number of schemes have been approved for implementation. as reconstruction of offices of EDO (A), DO and AO are concerned those are being taken up during the first year of the reconstruction programme under the Governance buildings. However, information on total damaged buildings and financial requirements concerning Agriculture and Livestock is provided as under:

Damages and Reconstruction Plan of Livelihood Buildings					
Completely Damaged	Partially Damaged	Total	2006-07 out of ERRA Fund	Balance	Cost (M Rs.)
28	4	32	17	15	65.209
Source: Internal Sources of DRU, Mansehra					

In order to accord due priority to livestock, six projects were prepared/ processed for reconstruction of Kaghan, Battal, Gari Habibullah, Sawan Mera and Morat Mera Veterinary Hospitals. The remaining damaged offices and residential buildings of the said Departments would be reconstructed/ retrofitted during 2007-08. Besides, Lower and Upper Siran Canals are being reconstructed/ repaired with the assistance of Japan International Bank for Cooperation.

3.3 Education

i. Extent of Damages

The damage to educational infrastructure in the district was very high as a total of 1,559 educational institutions both in rural as well as in urban areas were either destroyed or partially damaged. It also resulted in the loss of precious lives of a large number of students and the teachers who were present in those institutions at the time of earthquake. The damages to educational institutions in the district are given in the table below:

Extent of Damages to Education Sector									
Primary through Higher Secondary Education Institutions	Rural			Urban				Grand Total	
	Boys	Girls	Total	Boys	Girls	Private	Total		
Fully Damaged	459	262	721	12	10	192	214	935	
Partially Damaged	306	175	481	8	7	128	143	624	
Total	765	437	1202	20	17	320	357	1559	

Source: WB/ADB Preliminary Survey

ii. Reconstruction Plan

The reconstruction plan focuses on rebuilding the government educational facilities within a period of three years. In addition to the pledged 398 schools by NGOs, two colleges and 177 school buildings are being reconstructed during 2006-07 under 22 package projects; leaving 982 educational facilities to be reconstructed during next two years. As many as 50 school buildings have been tendered. Tehsil wise distribution of the reconstruction work is as follows:

Table 14				
Tehsil Wise Distribution of Reconstruction Work – Education Sector				
Tehsil	Total 2006-07	PC-1 App/ Processed	Tendered	Yet to be tendered
Balakot	58	58	-	58
Mansehra	89	88	40	48
Oghi	31	31	10	21
Total	178	177	50	127

Source: Internal Sources of DRU, Mansehra

In education sector, the overall reconstruction plan for 1st year with details and status of projects is given in the following table:

Table 15			
1 st Year Reconstruction Plan and Pledged Projects – Education Sector			
Tehsil	ERRA Fund		
	1 st Year	Pledged	Total
Balakot	58	118	176
Mansehra	89	236	325
Oghi	31	44	75
Total	178	398	576

Source: Internal Sources of DRU, Mansehra

Under the ERRA policy of ‘Build Back Better’ specific seismically resistant building designs have been developed. The plan included state of the art equipment and facilities for both students and teachers. Due importance is being given to improve the quality of education through software component of Teacher’s Training. The role of NGOs is commendable in reconstruction. The following table shows details of the pledged projects:

Table 16				
Details of Pledged Projects – Education sector				
Tehsil	Total	Work Started (Ongoing)	Work Completed	Balance
Balakot	118	10	1	107
Mansehra	236	27	7	202
Oghi	44	2	-	42
Total	398	39	8	351

Source: Internal Sources of DRU, Mansehra

3.4 Health

i. Extent of Damages

The damage caused by earthquake to the health infrastructure was very disruptive. A total of 43 health facilities were completely destroyed and 11 were partially damaged as a result of earthquake.

Extent of Damages to Health Sector						
District	No. of Tehsils	Union Councils	Health Facilities			
			Type	Total	Fully Damaged	Partially Damaged
Mansehra	3	63	BHU	58	23	7
			CD	20	7	-
			RHC	8	5	2
			CH	9	4	2
			THQH	1	1	
			DHQH/Teaching	1	1	
			Others*	2	2	
			Total	99	43	11

Source: ERRA Health Strategy Paper

*Other health facilities include first aid posts, MCH centres, TB centres etc.

ii. Reconstruction Plan

Immediately after the earthquake, most of the health facilities were made functional in transitional structures in collaboration with UN and other International Agencies. Earlier, it was planned to reconstruct/ repair 46 permanent facilities by June 2009 in lieu of 59 facilities destroyed in the district. However, after further rationalization by ERRA it has been decided to reconstruct 43 damaged health facilities including construction of EDO (Health) office. All health facilities had been pledged by the NGOs for reconstruction/ repair thereof.

Some facilities have already been completed. As far as the THQ Hospital Balakot is concerned, it is working in the structure built by Paktel. It could be considered as completed hospital because it can function for more than thirty years in the available structure. In addition, two facilities at Gari Habibullah and Attar Shisha have been completed and are serving masses in permanent structures. The office of the EDO (Health) is under construction.

Hospital, Gari Habibullah

60 bedded hospital, Gari Habibullah

Table 18

Reconstruction Plan - Health Sector						
Category	Year - 1 2006-2007		Year - 2 2007-2008		Year -3 2008-2009

BHU	3	7	15			
Civil Dispensaries					4	
Other HF			2			
Other HO	2					
Total:	16	8	18		4	

Source: ERRA Health Strategy Paper

Plans are afoot for another 31 facilities including 7 facilities by SDC while the balanced 8 facilities would be taken up by SDC next year after arranging required funds. In case SDC fails to fulfill its commitment, the said facilities would be reconstructed /repaired from ERRA funds.

The Health Sector strategy focuses on restoration of health care infrastructure through rationalized/integrated reconstruction and seismically safe and user friendly health facilities. At the same time, it recommends developing packages of services at different level for efficient service delivery. The quality enhancement through training of professional staff is also included in the plan.

3.5 Water and Sanitation

i. Extent of Damages

According to the district-wise socio-economic indicators in NWFP for the year 2005, only 64.15% of the population in Mansehra had access to potable/drinking water, while rest of the population availed the outside sources of drinking water. The earthquake destroyed some 735 schemes in the district. The number of public and community owned water supply schemes in need of rehabilitation/reconstruction in District Mansehra has been shown in the following table:

Type	No. of Units
Gravity	552
Pumping/Tube wells	15
Hand Pump	168
Total	735
No. of PHED owned schemes	99
Number of TMA schemes	636

Source: Internal Sources of ERRA

ii. Reconstruction Plan

Out of the WSS schemes of ERRA, 666 were committed by NGOs while out of 99 schemes of PHED, 44 were being executed by NGOs. NGOs have completed 105 and 10 schemes of TMAs and PHED respectively. In addition, work on 20 schemes had been started by PHED. There were 447 left over schemes; of which 323 belonged to TMA Balakot, and a decision is awaited from ERRA for their inclusion in the strategy.

Water and Sanitation is considered a priority area both by the government and communities. WATSAN programme besides reconstruction of infrastructure includes components for waste management, reconstruction of building, and training of communities in seismic resistant building designs and hygiene as well as capacity building of concerned line departments. For the purpose, proper monitoring and technical assistance is being provided for quality assurance. Details of the reconstruction and its budget are indicated in table 20:

S. No.	Item	Description	Estimated Budget (Million Rs.)
1	Rehabilitation/Reconstruction of WSS / Infrastructure	735 damaged/destroyed schemes (228 in TMA Mansehra, 228 in TMA Balakot, 180 in TMA Oghi and 99 PHED Mansehra)	488.89
2	Rehabilitation/Reconstruction of Sanitation Infrastructure	Drainage, street pavements and public toilets. 56 schemes (8 in TMA Mansehra, 35	48.14

		in TMA Balakot and 13 in TMA Oghi)	
3	Solid Waste Management	Design of solid waste management system, design/development of landfill site and provision of necessary equipment and machinery	0.33
4	Rehabilitation/Reconstruction of Buildings	Rehabilitation/Reconstruction of office/residential buildings	5.16
5	Water quality monitoring and management	Water quality monitoring and chlorination + water quality monitoring lab (PHED Mansehra)	18.82
6	Community Mobilization / Hygiene Promotion	Workshops, Meetings, Community Sessions, Promotional Material	15.84
7	Project/Contract Staff Salaries	WatSan Advisor (1 no), Assistant Engineer (4 nos.), Community Development Officer (1 no), Sub - Engineers (9 nos.), Computer Operator (3 nos.) and Drivers (8 nos)	15.73
8	Vehicles	4WD Single Cabin Pick-up (8 nos) + 1 Double Cab	15.60
9	Equipment and Material	Water Quality Monitoring Kits, Computers, Printers, Office Furniture, Fax Machine, Photostat machine, Welding Plant with Generator	4.00
10	Consultancies / TA	Technical Assistance for detailed assessments, earthquake resistant designing and supervision for quality assurance	4.00
11	Training	Training on design and construction for earthquake resistant watsan infrastructure, project management, community mobilization/hygiene promotion, operation and maintenance	1.00
12	Outstation Travel	Lump sum	1.08
13	POL	For project vehicles	3.78
14	Operations and Maintenance	O&M of project vehicles/equipment	1.62
15	Contingencies	Lump sum	14.70
	Total (Million Rs.)		671.37
	Total (Million US \$)		11.19

Source: Internal Sources of ERRA – WATSAN Strategy Paper July 2006

3.6 Governance (Administrative Infrastructure)

i. Extent of Damages

The administrative set-up in the district was severely disrupted due to loss of office and residential accommodations of relevant functionaries as over 140 buildings were destroyed in earthquake. As many as 91 buildings were fully destroyed while 51 buildings were partially damaged in the district. Tehsil-wise information on destruction of governance buildings is as follows:

Table 21			
Extent of Damages to Governance Sector			
Tehsil	Completely Damaged	Partially Destroyed	Total
Balakot	46	1	47
Mansehra	35	44	79
Oghi	10	06	16
Total	91	51	142

Source: Internal Sources of DRU, Mansehra

ii. Reconstruction Plan

The basic thrust of the reconstruction strategy for Governance Sector is to restore the buildings to the pre-earthquake level and also improve the governance system in the affected district including provision of logistic support and capacity building of the administration personnel. The overall financial budgeting for governance buildings in Mansehra District has been shown in table below:

Table 22			
Year-Wise Financial Plan-Governance Sector			
2006-2007	2007-2008	2008-2009	Total in Rs.million
148.0021m	224.2456m	76.24349m	448.4912
33%	50%	17%	100%

Source: Internal Sources of ERRA – Governance Strategy

Reconstruction/repair of 47 buildings has been taken up during 2006-07 out of ERRA fund. Required projects/schemes have been approved. Reconstruction of the balance buildings is being phased out over next two years. Tehsil-wise reconstruction plan of governance buildings is shown in the following table:

Table 23				
Tehsil-Wise Reconstruction Plan of Governance Buildings				
Tehsil	Total No.	2006-07	2007-08	2008-09
Balakot	47	8	20	19
Mansehra	79	34	25	20
Oghi	16	5	6	5
Total	142	47	51	44

Source: Internal Sources of DRU, Mansehra

The reconstruction of government buildings has been rationalized to make them function more efficiently and accessible for public convenience. Previously, district government offices were scattered all over the area but now with the introduction of the idea of a District Complex, all administrative and public services will be put under one roof. The reconstruction of all major governance related infrastructure is being covered through ERRA fund. As per ERRA instructions, 47 buildings are planned to be reconstructed

during 2006-07. The balance 95 buildings would be taken up for reconstruction during next two years.

In order to help restore functioning of law and order machinery, reconstruction and repair of governance related buildings have been taken up on top priority basis. Most of the projects consisting of governance buildings were approved by the District Reconstruction Advisory Committee (DRAC) as early as in August, 2006. Implementation of reconstruction/restoration of Governance buildings have been summarized in the following table:

Table 24				
Tehsil-Wise Work Status of Governance Buildings				
Tehsil	Total 2006-07	PC-1 App / Process	Balance	Tendered
Balakot	5	5	0	5
Mansehra	35	32	3	32
Oghi	8	7	1	7
Total	47	*43	4	43

Source: Internal Sources of DRU, Mansehra

*Four facilities yet to be taken up include (a) District Secretariat, (b) Judges residences, (c) Building of TMA Mansehra and (d) Building of TMA Oghi. For projects referred to at (a) and (b) ERRA has been requested to include in their strategy while for schemes cited at (c) and (d) PC-Is of projects are awaited from the Line Departments.

3.7 Power (Electricity)

i. Extent of Damages

Due to the earthquake, break down of power occurred in Balakot town and the surrounding areas as well as in the Siran Valley. Balakot and the surrounding areas were cut off from the National Grid Station. Major losses as reported by the Deputy Manager, PESCO, Mansehra were as under:

- a. 33 KV Kaghan Line (10 KM)
- b. 11 KV Balakot Feeder (25 KM)
- c. Trasmisssin Line from Balakot to Hangrai (30 KM)
- d. 11 KV Gari Habibullah feeder (06 KM)

In addition to death of a Lineman, loss of 11 KV transmission equipment, as stated by the PESCO, is given in the following table:

Table 25				
Extent of Damages to Power Sector				
S. No.	Specification	Equipment/Grid Loss (No.)		
		Gari Habibullah	Balakot	Total
1	200 KVA	-	10	10
2	100 KVA	02	22	24
3	50 KVA	03	15	18
4	25 KVA	01	05	06
Total		06	52	58

Source: Deputy Manager PESCO, Mansehra

ii. Reconstruction Plan

PESCO has full responsibility for electricity distribution in the affected districts of NWFP (Abbottabad, Mansehra, Battagram, Kohistan and Shangla). It manages both the STG and distribution (11 KV and 0.44 KV) networks, provides consumer connections, and handles billing collection and other operational matters. Prior the earthquake, the average monthly demand for electricity in the two circles of PESCO (Abbottabad and Mansehra) was about 48 million KWh.

The electricity was restored to the affected areas including various camps within two days after the earthquake. However, the replacement of heavy equipment and transmission lines is in progress and would be completed by June 2008. For reconstruction of damaged facilities, procurement of necessary equipments (high and low voltage lines, transformers, grid station equipment, tools and vehicles) is being made to restore supply of power to pre-disaster level. Funding for power sector is committed by the Asian Development Bank (ADB) and the Japan Bank for International Cooperation (JBIC).

Financial Phasing of Electric Power Distribution Reconstruction and Rehabilitation Plan		
S.No.	Item Description	Cost (in Million Rs.)
1	132KV Transmission Line Material	-
2	132KV Grid Station/Transmission Line Equipment	25.000
3	Sub Stations Buildings (Non Residential)	11.640
4	Sub Stations Buildings (Residential)	10.450
5	PESCO Buildings (Non Residential)	17.181
6	PESCO Buildings (Residential)	36.308
7	H.T and L.T Structures	23.000
8	Accessories for H.T/L.T Lines	11.500
9	H.T and L.T Conductors	25.000
10	Distribution Transformers	26.000
11	Sub-services & Bulk Supply Connections	02.500
12	Meters for Connections	03.000
13	Testing Equipments & Line T&P	10.000
14	Installations Charges	26.406
Total		239.270

Source: Deputy Manger PESCO, Mansehra

3.8 Transport Sector

i. Extent of Damages

Severe damages were recorded in case of National Highways i.e. MNJ road. In addition, damage to other major roads was also colossal. It is felt that restoration of road network would take longer time than 3 years. NHA is also striving to restore 65 km in respect of Basian Balakot Narran (N15) road in the district as the same is being disrupted often by slides. A programme spread over 30 months for reconstruction of damaged parts of N-15 has been drawn. Reconstruction of the said road would start from 2007-08 and is expected to be completed by December, 2009.

ii. Reconstruction Plan

Reconstruction programme by the district Government for 2006-07 is given in the following table:

Table 27						
Reconstruction Plan of Roads by the District Government						
Dept.	Strategy Schemes		First Year Plan		Balance	
	Roads	Bridges	Road	Bridges	Roads	Bridges
W&S	151 (1478.25 km)	24 (1556.2 meter)	76 (744 km)	20 (1083 meter)	75 (734 Km)	4 (473.2 meters)
TMA, Balakot	23 (81.5 km)	3 (small bridges)	15 (33.5 km)	0 (suspension /culverts)	8 (48 Km)	3 (small bridges)
TMA, Mansehra	14 (19.25 km)	7 (suspension bridges/ culverts)	9 (19.75 km)	0 (suspension)	5 (6.9 Km)	7 (Suspension bridges/culver ts)
TMA, Oghi	145 (371.2 km)	6 (suspension bridges/ culverts)	65 (32 km)	-	80 (204.8 Km)	6 (Suspension bridges/culver ts)
Total	333 (1950.2 km)	40	229 (1527.75 km)	35	168 (993.7 Km)	20 (473.2 meters)

Source: Internal Sources of DRU, Mansehra

3.9 Telecommunication

i. Extent of Damages

Pakistan Telecommunication Company Limited (PTCL) is the main service provider in five earthquake affected districts of the NWFP. According to its survey, 16 exchanges of PTCL were completely destroyed, 37 were partially damaged and boundary walls worth of Rs. 15.480 million were destroyed/damaged due to the earthquake. The total loss calculated by the PTCL is around Rs. 45.300 million.

ii. Reconstruction Plan

Being a profit oriented entity, PTCL is going to rehabilitate the services from its own resources. Despite serious damages to the telecom network, immediate steps were taken to restore the communication to ensure uninterrupted operation of remaining telecommunication systems. Though the telecommunication infrastructure got severely damaged due to the earthquake, it was restored on urgent basis but most of the restoration was of temporary nature. In order to turn challenge of the natural disaster into an opportunity the Divisional Engineer, PTCL Mansehra, had forwarded requirements of the district to concerned authorities for replacement/repair of all damaged equipments and replenish stores by end of financial year 2007-08.

3.10 Social Protection

i. Extent of Damages

The victims of the disaster were mainly from vulnerable groups, living in comparatively inaccessible mountain areas with lower levels of income and service provision as compared to the national average. Further, population and social structures of the earthquake hit areas have been seriously affected by a large number of human deaths; adversely affecting the well-being of vulnerable groups i.e. women (including widows and single headed households), children (including separated, unaccompanied and orphaned), elderly (both women and men) and the disabled.

Based on the 1998 District Census Report, there were approximately 10,000 orphans by both parents in the district. According to projections from the Camp Survey conducted by the Population Council, the earthquake has caused 1,700 full orphans, 17,800 orphans by father and 21,440 orphans by mother. Of those, 497 children are in institutionalized care (359 in Aashiana and 138 in SOS villages). However, as part of the return process, numerous families who had initially spontaneously fostered children from their deceased relatives have at the time of leaving camps resorted to handing them over to institutional care. In addition the survey registered a total number of 5,388 widows in the camps, out of which 768 lost their husbands due to earthquake, while 4,620 were widowed before the earthquake. In addition, a substantial number of widows were accommodated in the communities before the earthquake who somehow managed to sustain a livelihood.

According to the 1998 Census, approximately 1.6 percent of the population has some kind of disability, which constituted 18,448 disabled persons in Mansehra District. Of the total disabled persons, 66 percent were living in rural areas; 28 percent were literate; and 14 percent were working to earn their livelihood.

As a consequence of the earthquake many elderly have been left without family support though their number could not be determined. Those who live with female-headed

households face obvious vulnerability, as do those who live with poor extended families. The total number of vulnerable elderly registered in the Camp Survey was 8,393 persons; of which 495 were registered as having suffered injuries and disability.

ii. Reconstruction Plan

In these circumstances ERRA had recruited a number of Coordinators for carrying out required social protection activities for the said destitute. A number of NGOs came to rescue the needy as well. A list of NGOs rendering help in reconstruction and rehabilitation efforts is attached (Please see Annex C).

3.11 Environment

i. Extent of Damages

The environment sector also faced damages. As many as 137 environmental facilities including buildings were damaged by the disaster and subsequent jolts and slides. The statistics of damaged facilities has been shown in the following table:

Extent of Damages to Environment Sector			
Depts.	Number of buildings		
	Completely Damaged	Partially Damaged	Total
Kaghan Forest Division (KFD)	50	15	65
Fisheries	03	01	04
Siran Forest Division	13	27	40
Agror Tanawal Forest Division	18	01	19
Kunhar Watershed Division	04	01	05
Wildlife Division	03	01	04
Total Buildings	91	46	137
Reforestation in KFD	0	1	1
Reforestation in SFD	0	1	1
Reforestation in ATFD	0	1	1

Source: Internal Sources of DRU, Mansehra

ii. Reconstruction Plan:

Projects have been approved for reconstruction of physical infrastructure in terms of 63 offices and residential buildings. Plans are afoot to restore pre-earthquake level of fisheries, forests and wildlife facilities in the shortest possible time span. Three projects for reforestation activities have also been approved to restore forest assets to their pre-earthquake level. Number of schemes approved for restoration of physical infrastructure and green sector are shown in the following table:

Table 29		
Environment Sector Reconstruction Plan with Cost		
Depts.	PC-1 Approved for three years	Cost
	(ERRA Fund 2006-09)	
Kaghan Forest Division	65	109.630

Siran Forest Division	40	97.396
Agro Tanawal Forest Division	19	24.726
Kunhar Watershed Division	05	26.395
Total Buildings	133	285.375
Reforestation in KFD	1	92.647
Reforestation in SFD	1	89.452
Reforestation in ATFD	1	45.312
Source: Internal Sources of DRU, Mansehra		

3.12 Tourism and Industry

i. Extent of Damages

Tourism and private business have suffered tremendous losses due to the earthquake. Number of small hotels and tourist lodges had been reported destroyed as per the survey conducted by ERRA in June 2006. Rebuilding of those facilities would be, primarily the responsibility of owners whose livelihoods depends on income coming from tourism. The district with its scenic beauty had a bustling tourism business, particularly during the summer season. Besides the physical structures, the allied services in the tourism sector have also suffered losses. The industry is an employer of unskilled and semi-skilled workers in elementary hospitality trades. Some 9% work force is associated with wholesale and retail trade working at restaurants and hotels.

ii. Reconstruction Plan

District Manshera has great potential for tourism because of its scenic beauty. It is expected that tourism will start flourishing in Kaghan Valley as usual provided Mansehra Naran road (N-15) remains open. For the purpose FWO has been tasked by the National Highway Authority to restore the said road to its pre-earthquake level.

Annexes

- A. Annual Work Plan; List of Projects/Schemes
- B. List of Union Councils
- C. Key Responsible Agencies and contacts in the District
