

December 16, 2025

Global Alerts - West Zone

Winter Storm / Snowfall - Canada

Affected Areas

Newfoundland, St. John's (Canada)

Duration

December 16 - 20, 2025

Hazard Types

Snowfall, Winter storm

Hazard Summary

Snow with intensifying northwesterly winds is resulting in blizzard-like conditions with near-zero visibility in blowing snow. Secure outdoor objects that could be lifted by strong winds. Take steps to be prepared for extended utility outages. Keep mobile devices charged. Avoid non-essential travel and outdoor activities. Winter Storm Warnings are issued when multiple types of severe winter weather (such as snow, freezing rain, wind and rain) are expected or occurring.
