

Heavy Rainfall Mixed with Snowfall – Saudi Arabia

Valid: from December 17th, 2025 to December 20th, 2025

Affected Areas

Rainfall is expected mainly over **central Saudi Arabia**, particularly the **Riyadh Region**, with some extension toward the **eastern parts** of the Kingdom.

Hazard Types

High risk of flooding and dangerous flash floods, heavy rainfall, snowfall.

Hazard Summary

A high risk of flooding and dangerous flash floods is expected over the eastern parts of Saudi Arabia on Thursday, Friday and Saturday. Additionally, some areas of central Saudi Arabia may experience heavy rainfall mixed with snowfall due to the influence of a severely cold polar air mass during the night from Wednesday into Thursday. A deep low-pressure system is expected to form north of the Arabian Gulf within the next few hours.
