

## Thunderstorms in UAE and surrounding areas

### Affected Areas

Al Dhannah City, Umm Al Ashtan, Al Jazeerah, Al Mirfa, Coastal and offshore areas of Abu Dhabi, parts of eastern Saudi Arabia

### Hazard Types

Extreme thunderstorms

### Hazard Summary

The hazard is severe thunderstorm activity with frequent lightning, likely accompanied by intense rainfall, gusty winds, poor visibility, and localized flash flooding. Such conditions pose risks to aviation, marine operations, power infrastructure, and outdoor activities, especially in coastal and offshore zones.
