Active Wildfire in Patagonia, Argentina

Valid: Ongoing | January–February 2026

Affected Areas

Southern Argentina (Patagonia Region), Chubut, Rio Negro, Neuquén, La Pampa

Hazard / Advisory Types

Wildfires, Smoke, Extreme Heat, Strong Winds

Hazard / Advisory Summary

Severe wildfires are ongoing across the Patagonia region of Argentina, driven by hot, dry, and windy summer conditions. Multiple active fire fronts have burned large forested and grassland areas, posing threats to nearby communities, national parks, and infrastructure. Smoke dispersion may degrade air quality, while rapid fire spread remains possible under prevailing meteorological conditions. Overall impacts are expected to remain high in fire-affected zones.
