Heavy Rainfall & Thunderstorm Alert – Africa

Valid: For a two week (from 23rd February to 8th March 2026)

Affected Areas

Central Africa (DRC, Angola, Zambia), East Africa (Tanzania, Kenya, Uganda), parts of Mozambique and northern South Africa.

Hazard Types

Heavy Rainfall, Severe Thunderstorms, Localized Flash Flooding, Gusty Winds.

Hazard Summary

Atlantic frontal systems are bringing periods of rain and gusty winds to western and northern Europe. Locally heavy showers are possible along frontal boundaries. Across central and eastern Africa, active tropical moisture is supporting scattered to widespread thunderstorms with locally heavy rainfall. Southern Africa, including Mozambique and northern South Africa, may experience intense downpours with isolated flooding risk. Weather remains unsettled in equatorial regions, while northern Africa stays mostly dry and stable.
