

Heavy Rainfall and Flood Risk in Coastal Areas of Colombia

Countries: Colombia

Hazard Type: Heavy Rainfall

Intensity: Moderate to Heavy

Expected Time of Occurrence: Within the Next 10–15 Days

Summary of Conditions:

Heavy rainfall is expected in the coming days across the coastal areas of Colombia, with rainfall amounts likely to exceed 150mm. The affected regions include Cali, Quibdó, Medellín, Popayán, Pasto, and Tulcán. This may result in urban inundation and localized flooding in low-lying areas.
