

FIRE DANGER WARNINGS Northern Cape (South Africa)

Affected Areas

Cape Town, Upington, Springbok, Vredendal, De Aar, Fraserburg
And Graaff-Reinet Bo Plaats

Hazard Types

Fire Danger Warning

Date: 1st April till Active

Hazard Summary

Extremely high fire danger is expected over the western parts of the Northern Cape due to **very hot, dry, and windy conditions**.

These conditions significantly **increase the risk of wildfires** and rapid-fire spread.

Residents are advised to **avoid open flames, report any smoke immediately, and follow local safety advisories**.
