

Heavy Rainfall/Flooding in Central-Eastern China

Affected Areas

Huainan, Fuyang, Pingdingshan, Suzhou, Nanjing, Taizhou, Yancheng China

Duration

August 1st, 3rd 2025

Hazard Types

Intensive Rainfall/Flooding

Hazard Summary

A strong monsoonal system is bringing intense and sustained rainfall to areas including Suzhou, Fuyang, Huai'an, Nanjing, and Taizhou. Rainfall rates have exceeded 100 mm/hour, with some areas seeing over 200 mm in the past 24 hours, triggering flooding. Major transport routes are affected, with road closures, flight disruptions, and suspension of local ferry and rail services in flood-hit zones.
