

November 25, 2025

Global Alerts

Strong Wind Alert– Russia

Affected Areas

Arctic Coast, Northern Ural Region, parts of Western Siberia

Duration

25th to 27th November, 2025

Hazard Types

Strong/Gusty Winds

Hazard Summary

Strong winds with gusts capable of causing structural damage, falling branches, and blowing snow are expected in the northern regions. Wind driven snow may cause sudden visibility drops, especially along highways and open terrain. Outdoor activities should be minimized, and loose objects should be secured to prevent wind damage.
