

November 25, 2025

Global Alerts

Snowfall / Blizzard – Russia

Affected Areas

Northwestern Russia, Central Russia, Northern Volga Region, Arctic Coastal Belt

Duration

25th to 27th November, 2025

Hazard Types

Snowfall / Blizzard Conditions

Hazard Summary

A strong winter system will bring moderate to heavy snowfall, accompanied by blowing snow and reduced visibility. Arctic and northern regions may experience near-blizzard conditions due to high wind speeds. Travel disruptions, flight delays, and road closures are likely, especially during peak snowfall hours. Residents should avoid unnecessary travel and stay updated on local advisories.
